

# **NOTICE TO ALL MEMBERS**

## **Compost**

This is a notice to inform members that due to bear sightings in Mosquito Creek Co-op, Compost has been suspended until further notice.

The Board of Directors have been working together with the City of North Vancouver, Waste Connections of Canada, North Shore Black Bear Society and the Conservation Officers to create a plan of action to prevent wildlife from entering our complex.

We have been given confirmation to dispose our compost in the garbage cans temporarily until a plan is in place. We do recommend storing your compost until close to garbage collection day.

Members have approached the Board with ideas such as creating enclosed compost/garbage areas, bear proof bins, and so on. We are looking into all avenues to solve this matter and appreciate ideas from the Membership.

Once the Board collects all the information we will share this information with all Members. Please visit the Mosquito Creek Website for more information about Coexisting With Wildlife and Bear Friendly Tips.

Please Respect and Help Protect our Bears.

Thank You for your Cooperation,

Board of Directors
